Web Technologies: HTML5, CSS3

Tools: Git, GitHub, Oracle Cloud

Database: MySQL,MongoDB

Others: SEO, Adobe Photoshop, NPM, REST API, JSON, Babel, Yarn

Frameworks/Libraries: React.js (including Hooks, Router), Next.js, Redux, Tailwind CSS

PROJECTS DONE

Spotify Clone
https://github.com/thasneem1997/spotify-clone
- Developed a Spotify clone using React and WebAPI, enabling users to log in to their accounts and stream their favorite songs

DailyFocus - Browser Extension
https://github.com/thasneem1997/browser-extension
- A React-based browser extension designed to enhance productivity by displaying a new motivational quote and a beautiful background image with each new tab. It includes a to-do list feature for task management and a daily focus element to help users stay on track with their daily goals. Live Demo: **https://browser-extension.onrender.com/**

Food Delivery App
https://github.com/thasneem1997/food-delivery-app
- Developed a fully responsive web application for food delivery named 'Tomato.' Features a user-friendly interface allowing customers to seamlessly browse menus, add items to their cart, and proceed to payment. Live Demo: **https://food-delivery-app-phi-ebon.vercel.app/**

ACHIEVEMENTS

The Complete 2023 PHP Full Stack Web Developer Bootcamp" on Udemy

Certified in MERN Stack from GeeksforGeeks

Selected at the QDB Hackathon 2023 in Qatar for the 'Speechzy' app development project.
